

Independent Assurance Statement to Biogen Inc.

ERM Certification and Verification Services (ERM CVS) was engaged by Biogen Inc. (Biogen) to provide limited assurance in relation to specified 2019 environmental, safety, and social data in Biogen's 2019 Corporate Citizenship Report as set out below.

Engagement summary	
Scope of our assurance engagement	Whether the 2019 data for the assurance indicators, as identified in bold in the "GRI Data Table" on https://biogen.com/en_us/yearinreview/datatable.html are fairly presented, in all material respects, with the reporting criteria.
Reporting criteria	WBCSD/WRI GHG Protocol (2004, as revised January 2015) for the Scope 1 and 2 GHG emissions; Biogen's Value Chain Calculations Methodology for Scope 3 GHG emissions; Biogen's internal reporting criteria and definitions as described in footnotes of GRI Table; and GRI Sustainability Reporting Standards
Assurance standard	ERM CVS' assurance methodology, based on the International Standard on Assurance Engagements ISAE 3000 (Revised) and ISAE 3410 for GHG emissions
Assurance level	Limited assurance.
Respective responsibilities	Biogen is responsible for preparing the data and for its correct presentation in reporting to third parties, including disclosure of the reporting criteria and boundary. ERM CVS's responsibility is to provide conclusions on the agreed scope based on the assurance activities performed and exercising our professional judgement.

Our conclusions

Based on our activities, nothing has come to our attention to indicate that the 2019 data for the selected indicators, as identified in **bold** in the "GRI Data Table" on https://biogen.com/en_us/yearinreview/griandsasb.html are not fairly presented, in all material respects, with the reporting criteria.

Our assurance activities

Our objective was to assess whether the selected data are reported in accordance with the principles of completeness, comparability (across the organisation) and accuracy (including calculations, use of appropriate conversion factors and consolidation). We planned and performed our work to obtain all the information and explanations that we believe were necessary to provide a basis for our assurance conclusions.

A multi-disciplinary team of EHS and assurance specialists performed the following activities:

- Interviews with relevant staff to understand and evaluate any changes to the data management systems and processes (including IT systems and internal review processes) used for collecting and reporting the selected data;
- An analytical review of the data and a check on the completeness and accuracy of the corporate data consolidation, including conversion factors and emission factors used.
- A visit to the Biogen headquarters in Cambridge, Massachusetts to interview Biogen personnel and review program documentation, including calls with business level representatives to review local reporting processes and consistency of reported annual data with selected underlying source data for each indicator, checked calculations and assessed the local internal quality and assurance process.
- Cross checking that the purchased Carbon Offsets, Renewable Energy Certificates (REC), Guarantees of Origin, International-RECs and Green Power Certificates were retired/managed according to Biogen's Sustainability Data Collection and Reporting Procedure, which includes Carbon Neutral Methodology.
- A review of the consolidated year end data.

The limitations of our engagement

The reliability of the assured data is subject to inherent uncertainties, given the available methods for determining, calculating or estimating the underlying information. It is important to understand our assurance conclusions in this context. Our independent assurance statement provides no assurance on the maintenance and integrity of the website, including controls used to achieve this, and in particular whether any changes may have occurred to the assured information since it was first published.
